Furthermore. Winnings showed conspicuous weakness. The Michigan condition showed an improvement of 1 per cent. The Missouri condition was given at 79 per cent. and the acreage at 1.659,000. At one time early in the day prices were firm on open support by Patten interests, covering of shorts and Liverpool buying. Many bullish crop reports continued to be received. The receipts at the American Northwest continued light, amounting to only 345 cars, against 512 last week and 653 last year. The stock at Minneabolis showed a decrease of 90,000 bush, thus far this week. Cash premiums were generally firm especially at the Southwest, where in some instances they were increased.

Bulls enlarged on a statement by James J. Hill, who was quoted as saying that wheat was pretty well moved out of the Northwest and that he thought it would easily sell at \$1.25, adding: "It will only be a short time before this country will not only not have any wheat to export, but if the rapid growth of population keeps on, with no increase in wheat acreage, we will soon have to import wheat from Canada and other countries."

Bartlett, Shearson. Barrett, Adams and Daggett were good buyers.

But support was withdrawn later on and prices broke sharply under active selling for both sides of the account. Bulls contend that the general situation is unchanged and that it is only a question of time when prices will advance materially, because supplies in farmers hands and in elevators are rapidly nearing exhaustion, but sentiment among many traders at the moment is bearish mainly because of the recent Government report, the lessened cash demand and the fact that prices are considerably higher that a year ago, when visible supplies were smaller than now.

A Montreal report states that up to December 1 only 41,350,000 bush, of the Manitoba crop had been marketed and that a very heavish mainly because of the recent Government report, the lessened cash demand and the fact that prices are considerably higher that a year ago, when visible supplies were smaller than now.

THE CORN SITUATION.

Corn was easier on the whole, though at one time it was firm largely because prominent shorts at the West were disposed to cover on indications of less favorable weather for marketing. But with wheat weak, the cash trade quiet and the country apparently disposed to part more freely with its crop most people were disposed to sell.

Armour sold December. Patten bought December and May on the decline. Chicago expects 363 cars to-day, or about 100 more than it got yesterday. Liverpool declined 1/10.
